Atlantic Stoneworks, Inc. • 1757 Larchwood • Troy, MI 48083

Delivering competitive prices and global sourcing, Atlantic Stoneworks, Inc. offers wholesale, fabrication and installation of natural stone products for both commercial and residential applications.

Atlantic Stoneworks offers natural stone, including perennial favorites such as marble, granite and limestone, but also less common materials. In fact, Atlantic Stoneworks has a network of global suppliers that can accommodate nearly any order, no matter how difficult the material is to find. "If it's on earth, we'll find it for you," declares Mazzin Najor of Atlantic Stoneworks.

Fabrication capabilities include both the most modern and the best of the old-world style. The robotic division offers state-of-the-art machine-cut work, capable of handling projects of all sizes and specifications. In addition to the modern amenities of stone cutting, Atlantic Stoneworks retains a staff of

old-world-quality craftsmen. "We always stress that we still offer hand-cut work," says Najor. "We believe there is a difference between quality craftsmanship and automation, and we continue to offer the highest quality of both styles."

For example, in commercial work, the speed and price of automation is almost always a selling point. However, for restoration projects, high-end residential and other premier projects, Atlantic Stoneworks can deliver hand craftsmanship with a modern price point.

The company's qualified installation team can place countertops, fireplaces and stone flooring in new buildings. There are also specialists available to handle delicate restoration and refurbish work. Of course, the installation team can perform interior and exterior jobs.

Most of Atlantic Stoneworks' business comes from referrals and traditional bids. The company solicits work, of course, and also benefits from having a showroom in Troy that is open to the public.

"We have a very knowledgeable service staff that offers competitive pricing and a very high quality of work," says Najor. "Our service staff is outstanding." The staff stays true to the company's work ethic and each

staff member offers a long background in the industry.

Atlantic Stoneworks has been a prolific natural stone supplier and installer in the Detroit metropolitan area for years. From hospitals to casinos, the staff has tackled them all. Included on the company's list of recent accomplishments are projects such as ParkWest Gallery in Southfield and the Christian Memorial Mausoleum in Rochester Hills. In addition, the company has done extensive work at General Motors Corporation's new world headquarters (formerly the Renaissance Center), including General Motors' facilities as well as many restaurants within the complex.

Atlantic Stoneworks offers competitive prices, global sourcing and unparalleled craftsmanship in both commercial and residential stonework. Call them for your next project.
